

# Managing Migraines

## - Ladislav Pasztor, MD, MSc.

The number of new diagnostic methods is growing, new drugs and therapies are constantly on the market. But the number of patients with chronic diseases is growing and growing. Something's wrong. Yes, it is true that we live longer, but unfortunately we are not healthy. Why do we have more and more patients with diabetes, hypertension, migraine, back pain, and so on?

What is the solution?

Come and listen to Dr. Pasztor who will introduce you to the medicine of the 21st century now: Physical vascular therapy and how he has generated many success stories for several years. In particular the management of migraines.
